## MINING, BUSINESS AND STOCKS.

## TO WORK THE SILVER SHIELD

Preparations for Operating on a Large Scale Going On.

BEAVER TRANSACTION.

Former and Futile Efforts in That County-Will Mexico Demonetize Silver !- Other Mention.

Occasionally the reader will observe in the stock reports of this column the name of the Silver Shield, and notwithstanding the splendor and romance surrounding the name, the prices offered or paid for stock are decidedly plebeian. This is not understood to be because of the lack of natural resources, but on account of work not having been done of late. As a matter of fact it is one of the old reliables of the old reliable camp of Bingham, and the reason nothing of consequence has been done on it for a year or more is that old familiar one that water appeared and offered a substantial objection. Recently a contract was entered into with the Old Niagara people by which the latter's tunnel running into the hills from the main canyon over 3,000 feet easterly toward the Shield property could be utilized. By means of this arrangement the latter company will escape the water nuisance and be able to work its own deposits, which tie between the said tunnel and the lowest level of its abandoned workings, said territory being virgin soil and known to be very rich.

From a gentleman down from Bingham who will have some part of the new workings in hand, it is learned that the necessary power for operating the Burleighs which will be used in the new workings of the Silver Shield, will be had by contract from the United States company to draw upon its giant compressor, which already furnishes power for at least a dozen of its own properties and is yet such a vast scheme that it can let the Shield have what power it requires. The indica-tions are plain that when the vein is cut, which may be in a few weeks or months at the most, the Shield will come somewhat nearer resembling its name as relates to the stockholders and promoters and again become one of the big producers, shippers and dividend payers of Bingham canyon.

#### MINING STOCK EXCHANGE. Martha Washington Still the Center Of Attraction.

The ballooning which Martha Wash-The ballooning which Martha Washington stock is engaging in gives out an appearance suggestive of anything but a corner. Whatever the rise may be attributed to it is or so far has been steady and the limit had not apparently been reached at the morning session of the board. Indeed, after adjournment, and even when the open board had concluded its operations, offers to buy at higher figures, then the closing buy at higher figures than the closing were made with apparently more operators willing to buy than sell. So it might as well go on record as a boom. Daly-Judge showed the greatest advancement of any of the heavier stocks, one bunch changing hands at Daly-West was firm at the finish at

There were numerous transactions in Wabash, which continues to swing close to its moorings of a week or more

N. A. Page, Stock Broker,

Loans money on stocks at bank rates. Room 26, Walker Bank building. ANOTHER BEAVER TRANSACTION And Others to Come- A Reminiscent

Incident. Another Beaver county transaction in mines is recorded, this time relating to the Washington group near Frisco. It has passed into the hands of a Salt Lake company, headed by Witcher Jones. The property joins that of the properly and explaint for head already. Imperial and exploitation has already begun, and the ore-copper, chieflyso far uncovered, is said to be equal to any yet found in that neighborhood,

which is saying a good deal. It is the intention to here into the property from

Loeber Gulch, on the west side of the ridge skirting the town and work is to be prosecuted vigorously. The mention of the name Loeber brings up the abortive efforts of that gentleman some two and a half decades or more ago to make a success of mining in that same neighborhood. Hav-ing but little if any capital but suc-ceeding in causing it to be understood that he was well "heeled," he had but little difficulty in enlisting some of the substantial men of Beaver county is substantial men of Beaver county is his enterprise, among them the late James Low. A shaft was sunk, a whim constructed, a smelter put up near the Beaver river some 20 miles distant, teams were engaged and some bullion was actually turned out. Meantime the "judge" was living in tall clover in Beaver city; but there was no railroad then and to carry along such an enterprise under such circumstances quired more money than was on hand or attainable, and so, after a few spasmodic efforts at keeping the busi-ness on its feet, the workings were shut

down, all places were abandoned, the smelter was dismantled and the jig was up.
All this does but illustrate how difficult it is to make a success of other than placer gold mining under what would otherwise be favorable circumstances, when there is no railroad handy. The landscape of Beaver county in places was fairly dotted with deserted dumps, marks of former buildings, and all the tumbledown debris characterizing the fruitless efforts of persevering and doubtless deserving men to pull their locations up to a point where the tide of commercial af-fairs would reach and carry them along. Perhaps there are many of them there yet. The most of those which have of late been exploited and are being worked so successfully are by no means new discoveries, but formerly idle or abandoned old ones. The owners doubtless knew that they had fortunes so far as nature can supply them, but they were ahead of their time, as witness the Beaver county of today with something paying from the start and previously unheralded paraded before us every 24 hours or so: Such transactions as that above set out are types of a great number and the end is not yet by any means.

#### MEXICO AND SILVER.

Will the Neighboring Nation Go to The Gold Standard Too?

Discussing the above subject the Denver Mining Reporter speaks in the llowing strain:

The price of silver is falling steadily in spite of the predictions of the of-ficials of the smelter trust. It has now reached 47½ cents per ounce, and the tendency is steadily downwards. The causes of this seem obscure and the reasons tentatively advanced are not at all convincing. The primary reason is no doubt the firm belief of the business man of the reasons tentatively. ness men of the world that silver is doomed as a basal money. The cause of the present flurry is doubtless the discussions, that we have reason to beleve, are going on in the cabinet of President Diaz as to the advisability of Mexico going on a gold basis. Already one of the great business concerns of Mexico—the Mexican Central railroad—has gone upon a gold basis, exchanging Mexican dollars for 50 cents gold in paying their employes. With Mexican dollars dangerously near 30 cents, the increase in wages of their men, as measured in silver, is enormous. We doubt if the Mexican Central can continue to carry out the policy alluded to. The call for the demonstization of silver in Mexico comes from the banks.

importers and the railroad bondholders Whether President Diaz can, or is willing to, withstand the demands of these influential people is doubtful, although it is commonly believed in Mexico that the president is very adverse to them.

#### MORE OF THE GOLD DUST. Some Splendid Samples Received And a Shipment on the Way.

Samples received by Dr. Hasbrouck this morning from the Gold Dust com pany's property at Leesburg. Lembi county, Ida., are on exhibition at his office in the Commercial building. They are all high grade, gold-bearing rock but some of them are things of beauty, even to the unaided eye showing up minute nuggets of the yellow stuff, in a manner suggestive of the old-time Golconda. They are too rich to be wasted in assaying and the best of them will be sent to the eastern holders for cabinet purposes. A shipment is on the way and on its reception, which will be in a few days, it will be worked up at once and the returns made known. An estimate by an experienced man places the amount of ore which the tunnel now being pushed will produce, figured at the lowest assay received—\$10 a ton—at \$4,000,000. There is nearly three feet of snow on the ground and all around, but this will not impede working or shapping to the impede working or shipping in the

It is learned that the remaining 5-12 of the St. Anthony group of Bingham were taken up this morning by a representative of the New Haven company and the money was paid.

## A SPILLING OUT OF STOCKS.

Occurred While Operators Waited

CAUSED DECLINE IN PRICES

To Hear of Gold Shipments.

This Was Momentarily Checked When Selling Was Resumed - Standard Railroad Stocks Offered Freely.

New York, Dec. 10 .- Only a few stocks were quoted at the opening today and the majority of these were unchanged from last night's prices. The easier tone of the London market had but slight effect here. Great Northern preferred rose a point. Liquidating sales made their appearance in some of the leading railroads and specialties, forcing St. Paul, Louisville, Manhatten, Hocking Valley, General Electric and Colorado Fuel from 1 to 11/2 under last night. Sugar reacted 11/2 below its opening and a rise of a point in Colorado & Southern was not maintained. Obscure stocks made larger losses. The waiting attitude of stock opera-

tors was maintained until the report of an engagement of \$50,000 gold for shipment to South America tomorrow, when there was a spilling out of stocks all around the room. Declines reached a point or more in Pennsylvania, New York, C. & O., Reading, the Rock Island stocks, Canadian Pacific, Amalgamated, the local tractions and s rumber of less prominent stocks, Colorado Fuel lost 24 and General Electric 3. Prices were slightly better at noon and the slight activity subsided.

Bonds were irregular at noon. The check to the decline was only momentary and the selling was resumed. Standard railroad stocks and Man-hattan and Sugar were freely offered nd sold btlow their forenoon lowest.

Purchases by the short interests gave an ocasional check to the decline, but offerings. By 2 o'clock St. Paul, Louis-ville, Pennsylvania, B. & O., N. Y. Cen-tial, Reading and Sugar had been driven 2 points or more below yester-day's close, Colorado Fuel dropped

COMPORTABLE HOMES

Can be Buitt in California Cheaper and

California one must be wealthy. On the contrary, there is no other place where a family of moderate means can

make a living more easily, or where they can enjoy one-hair the luxuries that are within their reach in Califor-nia. It certainly is not wise for a fam-

ily to land there with nothing ahead. One who has not been thrifty enough

income will therefore be nearly all net. Expensive buildings are not necessary,

s the weather is always mild. life in

the open air being entirely agreeable

During the time the orchard is coming into bearing, enough can be raised

between the trees to furnish a family

with sublistence, and as there is no

fruit crop to harvest on the home place, there is time, as there is always op-portunity, for those who choose, to find pleasant and remunerative labor upon

aces already in bearing, and this may

add materially to the income.

A variety of California literature at-

tractively illustrated, describing its re-

ources, famous resorts and numerous

vonders, also maps and folders showroutes, through trains and other valuable information, may be obtained by addressing D. R. Gray, General Agent Southern Pacific Co., 201 Main
